

# City Choice Questionnaire

Thank you so much for taking time to fill this out. It is of great help to us and we truly appreciate it!

**\* Required**

Your Name \*

Your answer

Your E-Mail Address \*

Your answer

Pick any TWO of the following TIER 1 cities in which you'd want live in \*

- ☐ Ahmedabad
- ☐ Bengaluru
- ☐ Chennai
- ☐ Delhi
- ☐ Hyderabad
- ☐ Kolkata
- ☐ Mumbai

Pick any TWO of the following TIER 2 and TIER 3 cities in which you'd want live in \*

- ☐ Gurugram
- ☐ Guwahati
- ☐ Jaipur
- ☐ Jorapokhar
- ☐ Lucknow
- ☐ Patna
- ☐ Thiruvananthapuram
- ☐ Visakhapatnam

# City Choice Questionnaire

\* Required

## AQI Based Selection

AQI or Air Quality Index gives us a yardstick to know the level of pollution in our environment.

The higher the AQI value, the greater the level of air pollution and the greater the health concern. For example, an AQI value of 50 or below represents good air quality, while an AQI value over 300 represents hazardous air quality.

Following is the table of categories of Air Quality with respect to various values of AQI

AQI Range and Levels of Concern (Source: [airnow.gov](https://airnow.gov))

| Daily AQI Color | Levels of Concern              | Values of Index | Description of Air Quality  |
|-----------------|--------------------------------|-----------------|---|
| Green           | Good                           | 0 to 50         | Air quality is satisfactory, and air pollution poses little or no risk.   |
| Yellow          | Moderate                       | 51 to 100       | Air quality is acceptable. However, there may be a risk for some people, particularly those who are unusually sensitive to air pollution. |
| Orange          | Unhealthy for Sensitive Groups | 101 to 150      | Members of sensitive groups may experience health effects. The general public is less likely to be affected.                              |
| Red             | Unhealthy                      | 151 to 200      | Some members of the general public may experience health effects; members of sensitive groups may experience more serious health effects. |
| Purple          | Very Unhealthy                 | 201 to 300      | Health alert: The risk of health effects is increased for everyone.   |
| Maroon          | Hazardous                      | 301 and higher  | Health warning of emergency conditions: everyone is more likely to be affected.   |

Given the above Information, take a look at the following graph we made of the AQI values and their LEVEL OF CONCERN (color coded as above) for the Cities mentioned in the earlier section.

Data Source: [data.gov.in](https://data.gov.in)

## City-Wise Air Quality

With the above knowledge, pick any TWO of the following TIER 1 cities in which you'd want live in \*

- ☐ Ahmedabad
- ☐ Bengaluru
- ☐ Chennai
- ☐ Delhi
- ☐ Hyderabad
- ☐ Kolkata
- ☐ Mumbai

Similarly, with the above knowledge, pick any TWO of the following TIER 2 and TIER 3 cities in which you'd want live in \*

- ☐ Gurugram
- ☐ Guwahati
- ☐ Jaipur
- ☐ Jorapokhar
- ☐ Lucknow
- ☐ Patna
- ☐ Thiruvananthapuram
- ☐ Visakhapatnam

# City Choice Questionnaire

\* Required

Did your choice of cities change after knowing their respective Air Quality standing? \*

☐ Yes

☐ No

Do you think assessing the Air Quality of a place is an important step while deciding which city to live in? \*

☐ Yes

☐ No
